

VoiceAbility Values

Our values are what unite us as a team of people working together to achieve our mission. They are the qualities we demonstrate when we are at work and that we look for in new colleagues.

Passionate

We're passionate about strengthening voice, championing rights and changing lives. We're passionate about our independence and our professionalism. And we're passionate about our commitment to being the best at what we do.

Led by the people we work with

We put the people we work with at the heart of our work, and our organisation. We are patient and skilful listeners who help people's voices get heard, who act professionally on what we're told and know when to treat what people say with confidentiality.

Resourceful

We're about finding solutions, making things better and trying new ideas out - whether they work or not. We're about being creative, looking at things afresh, and about doing the very best we can with the resources we have.

Champions

We inspire and educate people about our work and our impact. We use what we learn to champion change in policy and practice wherever and whenever it's needed.

Partners

We believe in the value of partnerships and ensure that we make working with us a positive, constructive and enjoyable experience. We pride ourselves on being courteous, considerate, and reliable colleagues and partners to all those we work with.

Dedicated

We work with integrity and we stick to our principles. We're sincere, honest, open and transparent. We ensure our work and services are accessible and that we communicate what we do clearly and effectively.
